

Blowouts in your business travel budget?

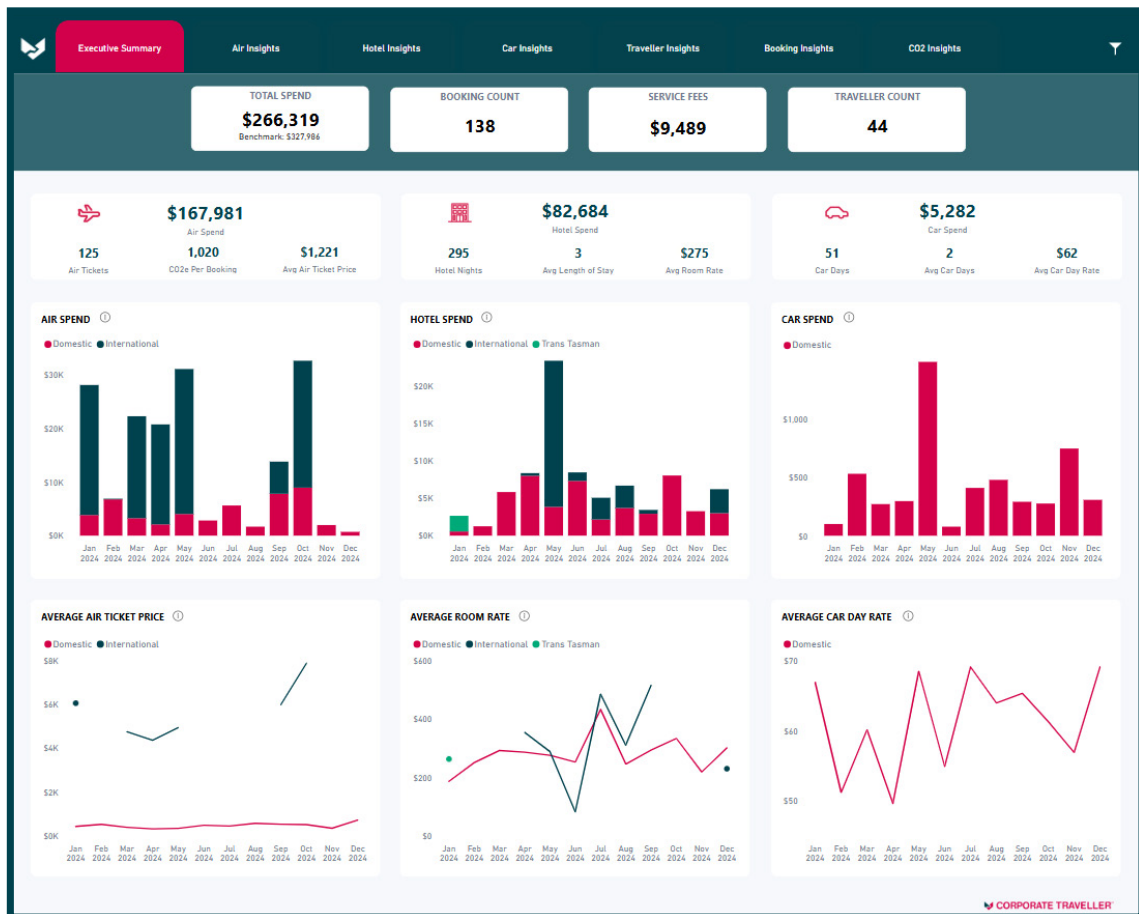

Get single-view tracking of your travel program spend

Managing travel budgets shouldn't mean digging through spreadsheets, chasing invoices, or waiting until month-end to realise you've overspent. If tracking travel costs feels like a challenge, you're not alone.

Corporate Traveller gives you a PowerBI dashboard that brings all your travel spend into one place, updated daily, so you always know where you stand. Our dashboards promote travel program performance, compliance and data fidelity.

Smarter insights. Faster decisions. No surprises.

- Full visibility of all travel costs – Flights, hotels, and car hire spending in one view, with daily updates.

- Track trends and traveller behaviour – Identify booking patterns, lost savings, and cost-saving opportunities.
- Filter and drill down into your data – Break down spend by department, trip type, or supplier with easy-to-use filters.
- Export reports anytime – Download Excel reports instantly for further analysis.
- See what's booked before it's spent – View upcoming travel costs so you can adjust budgets proactively.

What this looks like in real life

Without Corporate Traveller Analytics Dashboard	With Corporate Traveller Analytics Dashboard
Scattered receipts and invoices across multiple systems	All travel spend in one dashboard, updated daily
No real-time visibility—budget tracking happens after the fact	Track upcoming bookings before costs hit your budget
Finance teams spend hours compiling expense reports	Pre-built reports export in seconds for easy analysis
Hard to spot trends in travel spending	See patterns, highlight lost savings, and optimise costs
No clear oversight of travel policy compliance	Identify out-of-policy bookings and make adjustments

Get the clarity you need to keep costs in check

Corporate Traveller's analytics dashboard takes the complexity out of budget tracking so you can manage travel spend with confidence—without extra admin.

Let's talk about smarter travel tracking
